

NOTICE TO RESIDENT

Vehicular access to your property may be unavailable; the contractor is required to provide 24-hour notification of temporary loss of vehicular access/egress to your property. Access will be reinstated at the end of the work day, and if required to access or egress during the day, the contractor will provide steel plates to accommodate.

Should you have additional concerns about reduced access, such as business deliveries or accessibility requirements, please contact the project manager listed below.

Impact on the right of way and adjacent private properties

The construction is within the City's right of way but may result in some disruption to part of the private property directly adjacent to the work. The City will reinstate sections of landscaping, driveways and walkways that are disturbed by construction. However, if you have irrigation systems, garden beds or any other assets located within the City's right of way that you want to preserve, we suggest that you may want to move them in preparation for the construction work.

Construction disruptions

The contractor will take every precaution to minimize interruptions to the everyday life of your family and/or operation of your business, but, as you can appreciate, there may be some inconvenience during the course of the work, such as traffic delays, noise and dust. You may also feel vibrations due to heavy equipment operations. Vibrations from construction activities are quite common and rarely cause any problems. We would like to thank you for your patience and co-operation.

For construction activity hours of work, the City of Ottawa follows provincial requirements and the City's Noise By-law (2017-255).

Safety

The City of Ottawa is committed to safety in and around project sites. The project team continues to work closely with the industry and to comply with recommendations provided by municipal, provincial and federal health officials, as well as the Ministry of Labour, Immigration, Training and Skills Development.

Contact information

For any emergency outside normal working hours, please call the City at 3-1-1.

For general project information, please contact the City's Project Manager.

For construction related questions or concerns, please contact the Contractor Representatives.
